Subject: Relicensing of septage disposal and storage site located in Cary Plantation
Attachments: Scan0015.pdf

Good afternoon Paul,

We are in the process of relicensing our septage land spreading and storage facility located at 874 Jackins Settlement Road in Cary, ME. This site has been in operation since 1994 and operated in substantial compliance with the Maine DEP Septage Management Rules for 27 years. We need approval from the governing body each time we relicense, thus the reason for this letter. An approval form is attached for your signature.

Thank you,

Bruce E. Folsom *PBA HOLLISTON SEPTIC SVC.*
License holder

38 MRSA §1305(6) states that: "... any person may provide a site for disposal of septage. In addition to making application to the Department of Environmental Protection for approval of any site, that person shall have written approval for the site location from the municipality in which it is located, unless the site is located in a Resource Protection District under the jurisdiction of the Maine Land Use Regulatory Commission. A municipality may determine whether approval of the site must be obtained first from the department or the municipality. The municipal officers shall approve, after hearing, any such private site if they find that the site complies with municipal ordinances and with local zoning and land use controls. In the absence of applicable municipal ordinances and local zoning and land use controls, the municipality shall base its approval of the site on compliance with the siting and design standards in the department's rules relating to septage management. For the purposes of this subsection, a "municipality" means a city, town, or plantation."

The above statute requires the municipal officers, in the municipality which the proposed site is located, to determine whether the site location must be approved before the department issues a license or after the department issues a license. This requirement applies to septage license renewals. The following must be completed by an authorized municipal official:

The municipal officers of the municipality of CARY TOWNSHIP (municipality) have been provided with a copy of an application for approval of a Septage Land Application Site. The application has been submitted by BRUCE FOLSON DBA HAMILTON SEPTIC SVC. (applicant), and is for approval of a site located at 874 JACKINS SETTLEMENT ROAD (location). Pursuant to 38 MRSA §1305(6), the municipality has determined that approval of the site must (check only one of the following):

be obtained from the municipality prior to issuance of a Department Order
 be obtained from the municipality after issuance of a Department Order

RYAN D. PELLETIER COUNTY ADMINISTRATOR
Printed Name and Title of Authorized Municipal Official

10-20-21
Signature of Authorized Municipal Official and Date Signed

If municipal approval is required prior to approval by the department, the following must be completed:

The municipal officers of the municipality of _____ (municipality), after a hearing on _____ (date), have determined that the proposed septage site described in this application complies with municipal ordinances, and with local zoning and land use controls, or, because of the absence of municipal ordinances, and local zoning and land use controls, have determined that the proposed site complies with the siting and design standards in the department's rules relating to septage management. THEREFORE, the municipality APPROVES the site location described in the application of _____ (applicant).
